GEOMETRIC DIMENSIONING AND TOLERANCING (GD & T)

COURSE OBJECTIVES

Participants will be able to understand drawings with GD & T symbols. Case studies and hands-on exercises using specially selected drawings allow participants to use and apply the information learnt in the course. Participants may also bring company drawings for interpretation during live case studies.

COURSE CONTENTS

-  Geometric Dimensioning
-  Datums
-  Material Conditions
-  True Position Tolerances
-  Form & Orientation Tolerances
-  Runout & Profile Tolerances

TRAINER

Dr Bryan Ngoi is a consultant specializing in training and implementation of GD&T. He has over 12 years of experience and has trained more than 1500 participants in interpreting, measuring, gauging and analyzing geometric tolerances. He has been actively researching in the above area and has published more than thirty journal papers in international journals. He is currently developing a computer-aided dimensioning and tolerancing system that aids interpretation and analysis of geometric tolerances. He is also a qualified teacher, with a postgraduate diploma in teaching for higher education.

WHO SHOULD ATTEND

Technicians and Engineers in the areas of design, manufacturing and quality control who need to specify, interpret and apply geometric tolerancing.

AWARD OF CERTIFICATE

Certificate of Attendance will be issued to participants who have attended at least 75% of the course.

COURSE DATES
