OHSAS 18000:2007 & INTERNAL AUDITOR TRAINING

INTRODUCTION

OHSAS 18001 was created via the concerted effort from a number of the worlds leading national standards bodies, certification bodies, and specialist consultancies. A main driver for this was to try to remove confusion in the workplace from the proliferation of certifiable OH&S. specifications.

The (OHSAS) specification gives requirements for an occupational health and safety (OH&S) management system, to enable an organization to control its OH&S risks and improve its performance.

APPLICATION AND BENEFITS

The OHSAS specification is applicable to any organization that wishes to:

- Establish an OH&S management system to eliminate or minimize risk to employees and other interested parties who may be exposed to OH&S risks associated with its activities.
- Implement, maintain and continually improve an OH&S management system.
- Assure itself of its conformance with its stated OH&S policy.
- Demonstrate such conformance to others.
- Seek certification/registration of its OH&S management system by an external organization.
- Make a self-determination and declaration of conformance with this OHSAS specification.

OUTLINE OF THE WORKSHOP

1. Introduction to Safety Management System
2. Role of the Health and Safety Committee
3. OHSAS 18001 VS existing Safety Management Systems
4. Resources needed for SMS implementation
5. Proposed implementation guidelines
6. Interpretation of the SMS requirement
7. Overview of Risk Management / Control programmes
8. Roles of an internal quality Auditor

DURATION

14 hours (2 days)

AWARD OF CERTIFICATE

Certificate of successful completion will be issued to participants who have attended at least 75% of the course.

Certificate No: 6655731205
