

ISO/IEC 27001 - INFORMATION SECURITY MANAGEMENT SYSTEMS (ISMS) - UNDERSTANDING & IMPLEMENTATION

Introduction

The ISO/IEC 27000 family of standards helps organisations keep information assets secure. Using this family of standards will help your organisation manage the security of assets such as financial information, intellectual property, employee details or information entrusted to you by third parties. ISO/IEC 27001 is the best-known standard in the family providing requirements for an information security management system (ISMS). An ISMS is a systematic approach to managing sensitive company information so that it remains secure. It includes people, processes and data management systems by applying a risk management process. It can help small, medium and large businesses in any sector keep information.

Learning Objectives

By the end of the course, you would be able to:

- To understand what is an information security management (ISMS)
- To determine why an ISMS is important to an organisation and benefits
- To understand the background of ISMS
- To gain knowledge of the key concepts and principles in ISO/IEC 27001
- To determine the terms and definitions used
- To understand the requirements of ISO/IEC 27001

Duration

1 day | 9am – 5pm | 7 hours

Who should attend

Managers, Supervisors, Process Owners and those who wish to protect threats, establish effective data management controls, pursue opportunities for achievement of objectives, support other management systems, and instill stakeholder confidence.

Award of Certificate

Certificate of Completion will be issued to participants who have attended at least 75% of the course.
