ISO 31000:2018 - RISK MANAGEMENT - UNDERSTANDING & IMPLEMENTATION

ISO Standards

Introduction

Risks affecting organisations can have consequences in terms of economic performance and professional reputation, as well as environmental, safety and societal outcomes. Therefore, managing risk effectively helps organisations to perform well in an environment full of uncertainty. ISO 31000:2018, Risk management – Guidelines, provides principles, framework and a process for managing risk. It can be used by any organisation regardless of its size, activity or sector. Using ISO 31000 can help organisations increase the likelihood of achieving objectives, improve the identification of opportunities and threats and effectively allocate and use resources for risk treatment. ISO 31000 can be used as an enabler for risk-based thinking in ISO 9001, ISO 14001 and ISO 45001.

Learning Objectives

By the end of the course, you would be able to:
• Understand the fundamentals of risk management
• Gain knowledge of a risk management system
• Describe the key aspects ISO 31000:2018 and benefit to an organisation
• Outline the structure and purpose of ISO 31000:2018
• Understand the key principles of ISO 31000:2018
• Identify key aspects and interrelationships of a risk management framework with the organisation's management system
• Describe the risk management process
• Outline the key ingredients for implementation of a risk management framework

Who should attend

Managers, Supervisors, Process Owners and those who wish to protect threats and pursue opportunities for achievement of objectives, and strengthen reputation.
Award of Certificate

Certificate of Completion will be issued to participants who have attended at least 75% of the course.
