

# SUPPLY CHAIN MANAGEMENT (SCM) AND AUDITING

## Introduction

Supply Chain Management (SCM) encompasses the coordination of all activities like sourcing, design, production, warehousing, shipping, and distribution. The primary goal of SCM is to improve efficiency, quality, productivity, and customer satisfaction.

The purpose of a Supplier Quality Audit is to verify if the supplier's quality systems, processes, products and services satisfy or are in compliance with the requirements as set forth in the contractual agreements, procedures, and agreed standards.

## Learning Objectives

Understanding the role of Supply Chain Management and Auditing in managing the company's supply chain to minimize risks and costs, and identify potential quality issues, evaluate suppliers' capabilities, and fostering a collaborative relationship to drive continuous improvements.
